## DETAILED ACTION

### *Drawings*

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the grill configured to attach to a first motor assembly and a second, larger motor assembly must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

### *Claim Rejections - 35 USC § 112*

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. **Claims 5-10** are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 5, line 2, "a first motor assembly" should be --the first motor assembly--.

### *Claim Rejections - 35 USC § 102*

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. **Claims 1, 2, 5-8, and 11-16** are rejected under 35 U.S.C. 102(b) as being anticipated by **Sakakibara et al. (US 5,686,773)**.

**Sakakibara et al.** disclose in Figures 1-4 invention as claimed: a first motor endshield 5 having a plurality of attachment point 34, a plurality of second openings and bosses 65 and

74 for attachment to grill 50, 53, and fasteners 55, 56. The mounting method of connecting and using the disclosed features together is inherent to the disclosed structure.

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. **Claims 3, 4, 9, 10, 17, and 18** are rejected under 35 U.S.C. 103(a) as being unpatentable over **Sakakibara et al. (US 5,686,773)**.

**Sakakibara et al.** disclose the claimed invention except for the self-tapping fastener or the self-clinching nut. It would have been an obvious matter of design choice to design the end shield and to provide well known in the art self tapping fastener or the self clinching nut (Re US Patent 3,693,237 to Grube and 5,905,230 to Marik for the purpose of reducing the cost of the shield installing the end shield to sheet material, since applicant has not disclosed that these features solve any stated problem or is for any particular purpose and it appears that the invention would perform equally well with fastener and threaded hole system.

***Prior Art***

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
